### Theory:

Working with sessions and cookies in PHP

Security best practices for web applications

### Practice:

Implementing user authentication and authorization

Protecting against common security vulnerabilities like SQL injection and cross-site scripting (XSS)

## Session 17–18: Final Web Application Project (16 hours)

### Project Idea:

Students will work on developing a full-fledged web application using HTML, CSS, JavaScript, PHP, and MySQL, applying all the concepts and skills learned throughout the course. The application can be anything from a simple task manager to a more complex e-commerce platform.

### Practice:

Planning and designing the web application's architecture and user interface  
Implementing the backend functionality using PHP and MySQL  
Integrating frontend components and applying responsive design principles

Throughout the course, students will engage in self-practice sessions and solve mini-projects to reinforce their learning and develop practical skills. Assignments and quizzes can be given to assess understanding and progress. Additionally, guest speakers or industry experts will be invited to share insights on web application development and entrepreneurship in the tech industry.

Trainee will work on real time live projects to hone their web application development skills.

# WHAT WILL YOU GAIN?

---

**Practical Experience:** Hands-on experience is key to master the area of web creation and development. So, we offer real-world projects and simulations to help students develop practical skills.

**Networking opportunities:** Exposure to a diverse network of industry professionals, which can lead to potential job opportunities in future.

**Personal Growth:** Develop valuable soft skills such as teamwork, communication skills, problem solving which are essential in every successful career path.

**Mentorship:** Career guidance and job placement assistance is provided. Students will be benefited from one-on-one mentorship opportunities, receiving guidance from seasoned experts in the field.

# STUDENT'S TESTIMONIALS

"Doing this internship was the best decision I made for my career. The hands-on experience and guidance from industry professionals have been extremely valuable."

-  
Komal Patil

Getting a practical and professional experience was very important for my career. During this internship, I was entrusted with responsibilities that challenged me to think critically and creatively. The team was also very supportive that encouraged me to explore my interests. They even provided constant feedbacks reflecting upon my work that helped me a lot in my growth. Thank you for this opportunity!"

-  
Rohit Lohar

"I am so glad that I made the right decision to engage in this internship program. It provides a great platform to practice and polish the required skills in the IT field. I am extremely thankful for this enriching experience!"

-  
Kajal Kamble

"The skills I gained here have got me my dream job! I cannot thank the team enough for their guidance and support"

-  
Siddharth Chavan

"It provides a great platform to practice and polish the required skills in the IT field. I am extremely thankful for this enriching experience!"

-  
Akanksha Patil
